Olympia, WA 98504-0901
(360) 586-1140 FAX: (360) 586-1165
Steve Gorcester, Executive Director

### CITY MEMBERS

Mayor James Irish City of La Center

Mayor Patty Lent City of Bremerton

Mr. Mick Matheson, P.E. Public Works Director City of Sultan

Councilmember Bob Olson City of Kennewick

Ms. Laura Philpot, P.E. Public Works Director City of Sammamish

Mr. John Vodopich Planning & Community Dev Director City of Bonney Lake

# **COUNTY MEMBERS**

Councilmember Sam Crawford, TIB Chair Whatcom County

Mr. Gary Ekstedt County Engineer Yakima County

Commissioner Robert Koch Franklin County

Commissioner Richard Stevens Grant County

Mr. Jay Weber, Executive Director County Road Administration Board

Mr. Clay White Planning & Dev Services Director Snohomish County

# TRANSIT MEMBERS

Ms. Wendy Clark-Getzin, P.E. General Manager Clallam Transit

Vacant (Harold Taniguchi replacement)

# PORT MEMBER

Mr. John Klekotka, P.E. Port of Everett

# WSDOT MEMBERS

Mr. Pasco Bakotich, P.E. Director & State Design Engineer

Ms. Amy Scarton Assistant Secretary, Community Dev.

# **GOVERNOR APPOINTEE**

Mr. Jim Albert Budget Assistant to the Governor Office of Financial Management

#### PRIVATE SECTOR MEMBER

Ms. Heidi Stamm HS Public Affairs

#### NON-MOTORIZED MEMBER

Mr. David Ramsay Feet First (Seattle)

#### M2 BA Urban Arterial Program

The re-establishment of the Urban Arterial Program.

The Urban Arterial Program provides funding to counties within urban areas, cities and towns within an urban area, and cities with a population of 5,000 or greater. Projects are selected through a competitive process. Project selection criteria include safety, growth and development, mobility, physical condition, sustainability and constructability.

#### M2 BB Arterial Preservation Program

The re-establishment of the Arterial Preservation Program.

#### State of Washington

#### **Recommendation Summary**

Agency:	407	<b>Transportation Improvement Board</b>				9:03:55AM
						9/10/2014
Dollars in The	ousands		Annual	General		
		Averag	e FTEs	Fund State	Other Funds	<b>Total Funds</b>
The Arteni	ol Drocor	niction Drognom provides funding for evenlow of foderally	alogaified	antanial atmaata	in low toy have a	itica with a

The Arterial Preservation Program provides funding for overlay of federally classified arterial streets in low tax-base cities with a population greater of 5,000 and more. The projects are selected through a competitive process.

#### M2 BC Small City Arterial Program

The re-establishment of the Small City Arterial Program.

The Small City Arterial Program (SCAP) provides funding to cities with a population of less than 5,000 to preserve and improve the arterial roadway system. Projects are selected through a competitive process. Project selection criteria include safety, physical condition, and sustainability.

#### M2 BD Small City Preservation Program

The re-establishment of the Small City Preservation Program.

The Small City Preservation Program provides funding to cities with populations of less than 5,000 for chip seal, overlay of existing pavement, and sidewalk maintenance of existing sidewalks. Project selection criteria includes: pavement condition, economy of scale, roadway width, loading, and sidewalk maintenance. The projects are selected through a competitive process.

#### M2 BE Sidewalk Program

The re-establishment of the Sidewalk Program.

The Sidewalk Program provides funding for pedestrian projects in small cities and urban agencies. This program is funded by the Transportation Improvement Account-144. Urban agencies and small cities compete separately for grants. Project criteria include safety, continuity and connectivity, pedestrian access, sustainability, and local support.

#### M2 BG Road Transfer/City Hardship Assist

The re-establishment of the Road Transfer Program/City Hardship Assistance Program.

The Road Transfer Program/City Hardship Assistance Program funds rehabilitation and maintenance of eligible routes to cities with a population of 20,000 or less or with a net gain in cost responsibility due to a road jurisdictional transfer. The CHAP funds can be used for maintenance and rehabilitation of existing facilities and not for adding additional capacity.

#### PL A0 LED Street Light Program

The establishment of the LED Streetlight Program.

The LED Streetlight Program provides funding for streetlight replacement in low tax-base cities. Project selection criteria include leveraging other funds, potential savings, and owner/operating provider readiness (PUD, electric utility, city, etc.). The projects are selected through a competitive process with a focus on leveraging the state's buying power and efficient installation.

<b>Budget Period:</b>	2015-17	

<b>Decision Package</b>	
Code	Decision Package Title
PL-A0	LED Street Light Program

# FINAL

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BA	Urban Arterial Program
Budget Period: Budget Level:	2015- M2 -	17 Inflation and Other Rate Changes

#### **Recommendation Summary Text:**

The re-establishment of the Urban Arterial Program.

The Urban Arterial Program provides funding to counties within urban areas, cities and towns within an urban area, and cities with a population of 5,000 or greater. Projects are selected through a competitive process. Project selection criteria include safety, growth and development, mobility, physical condition, sustainability and constructability.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
144-1 Transportation Improvement Account-State	94,114,500	94,004,500	188,119,000
Total Cost	94,114,500	94,004,500	188,119,000

#### **Package Description:**

This package supports the Urban Arterial Program, which provides grants to counties within urban areas, cities and towns within an urban area, and cities with a population of 5,000 or greater. The program is funded by the Transportation Account-144. Projects are selected based on criteria in four areas: safety, growth and development, mobility, and physical condition. Additionally, all projects are rated on sustainability and constructability criteria.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the Urban Arterial Program will be used for projects that meet program criteria in order to increase safety, address localized traffic congestion, support economic development projects, and fix deteriorated roads.

#### **Performance Measure Detail**

Activity:

No measures submitted for package

Is this decision package essential to implement a strategy identified in the agency's strategic plan?

**Incremental Changes** 

# FINAL

#### Agency:

# 407 Transportation Improvement Board

#### **Decision Package Code/Title:**

# BA Urban Arterial Program

Yes. TIB's strategic plan goals and corresponding strategies include:

- Enhance Arterial Safety Fund projects that have a high potential for collision reduction based on safety criteria.
- Support Economic Development Use growth and development criteria to coordinate timely investments with reliable development opportunities; Focus investments on downtown and activity centers.
- Improve Mobility of People and Goods Fund projects that strategically add capacity and enhance multimodal options; Encourage projects that fill gaps and complete corridors; Use criteria that identifies projects that improve access to non-motorized mobility options, transit and freight.
- Maintain, Extend and Preserve the Life of Streets Fund arterial preservation projects.
- Encourage Environmental Responsibility Develop curriculum and provide training to customers on environmentally sustainable design; Fund projects that support sustainable design and construction, driven by up-to-date sustainability criteria.

Additionally, this program directly supports the following Washington State transportation policy goals: Preservation; Safety; Mobility; Environment; Stewardship; and Economic Vitality.

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priorities for 1) Prosperous economy, 2) Sustainable energy and a clean environment, and 3) Healthy and safe communities. Specifically, TIB grants are a critical funding source for local governments in building and sustaining infrastructure systems, and preserving existing infrastructure. Our sustainability criteria encourage agencies to minimize the environmental impacts of transportation infrastructure.

The Urban Arterial Program also supports the Governor's Executive Order 14-04/Washington Carbon Pollution Reduction and Clean Energy Action. Specifically, the Governor highlights clean transportation and identifying opportunities to increase statewide investments in multimodal transportation. Through this program, TIB requires sidewalks on both sides of the street and funds bicycle infrastructure for lanes or paths along arterials when consistent with a non-motorized master plan. Emphasis is placed on continuity and extension of existing infrastructure.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for on-going projects as well as new ones. Maintaining a consistent grant program is important to continually meet ongoing local government preservation needs.

#### What alternatives were explored by the agency, and why was this alternative chosen?

No other alternatives were explored. Current law revenue is dedicated for this purpose. In order to be fiscally responsible and allocate funds to the best local projects, TIB budgets to current revenue forecasts for future biennia.

#### What are the consequences of adopting or not adopting this package?

If this decision package is not funded, the Urban Arterial Program will not be offered and projects in both design and construction phases, awarded in previous years, will be impacted. This means TIB would not be able to reimburse local agencies for projects already under construction. Projects in design phase would be canceled.

Continued funding is crucial to meet current financial commitments for projects still under development as well as future reconstruction, rehabilitation and preservation needs. Not funding this program would also negatively impact progress towards the following Washington State transportation policy goals: Preservation; Safety; Mobility; Environment; Stewardship; and Economic Vitality.

#### What is the relationship, if any, to the state's capital budget?

# Agency:407Transportation Improvement BoardDecision Package Code/Title:BAUrban Arterial Program

Some projects may also receive funds from the State's capital budget as a separate funding source. The combination of funding sources is often critical in order to fully fund a single project.

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data, commitments for projects currently under construction, and future projects needed by eligible agencies. Revenue is calculated using the gas tax revenue forecast provided by the Forecast Council plus carry-forward balances.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

About 35% of the requested funds will be used to fund new projects. The remainder will fund projects currently in design or construction. Continued funding is necessary to pay for multi-biennial projects.

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BB	Arterial Preservation Program
Budget Period: Budget Level:	2015-17 M2 - Inflation and Other Rate Changes	

#### **Recommendation Summary Text:**

The re-establishment of the Arterial Preservation Program.

The Arterial Preservation Program provides funding for overlay of federally classified arterial streets in low tax-base cities with a population greater of 5,000 and more. The projects are selected through a competitive process.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
106-1 Highway Safety Account-State	3,000,000	3,000,000	6,000,000
Total Cost	3,000,000	3,000,000	6,000,000

#### **Package Description:**

The Arterial Preservation Program is funded by the 106 Highway Safety Account. This program provides funding to improve poor pavement conditions in low tax-base cities with a population of 5,000 or more. The program provides assistance for resurfacing existing arterials, required ADA ramp upgrades, and minor associated sidewalk repairs. Although this program offers cities critical preservation assistance, it is not enough to substitute for a city's own street maintenance program. Therefore, the program is limited to overlay in an effort to defray high cost preservation projects, allowing cities to concentrate their own limited resources on lower-cost preventative maintenance.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the Arterial Preservation Program will be used for projects that meet program criteria in order to increase the overall pavement condition of the arterial system in eligible cities.

#### **Performance Measure Detail**

#### Activity:

No measures submitted for package

**Incremental Changes** 

#### Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. One of TIB's strategic plan goals is to maintain, extend, and preserve the life of streets. This program specifically supports the

**FINAL** 

strategy to fund arterial preservation projects.

Additionally, it supports the Washington State transportation policy goal: Preservation (to maintain, preserve, and extend the life and utility of prior investments in transportation systems and services).

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priority for 1) Prosperous economy, 2) Sustainable energy and a clean environment, and 3) Healthy and safe communities. Specifically, TIB grants are a critical funding source for local governments in building and sustaining infrastructure systems, and preserving existing infrastructure.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for new preservation projects. With funds appropriated from the Highway Safety Account, TIB has been able to extend preservation assistance to cities with population of 5,000 or more and with low property assessed valuation. Maintaining a consistent grant program is important to continually meet ongoing local government preservation needs.

#### What alternatives were explored by the agency, and why was this alternative chosen?

If this decision package is not funded, the Arterial Preservation Program will not be offered to low tax-base cities with a population of 5,000 or more. This will cause cities to defer needed maintenance and preservation, and to do smaller projects at a higher unit cost. Continued funding is crucial to meet cities' ongoing preservation needs. Any lapse in program funds will lead to delayed maintenance, continual deterioration of local government streets, and increased costs over time.

#### What are the consequences of adopting or not adopting this package?

Cities with a population of 5,000 or more and with a low property tax assessed valuation will continue to defer needed street preservation. This will result in more expensive rehabilitation costs in the future. Not funding this decision package will also negatively impact progress toward the Washington State transportation policy goal of maintaining, preserving, and extending the life and utility of prior investments.

#### What is the relationship, if any, to the state's capital budget?

None

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

The TIB requires Arterial Preservation Program projects to be completed within the fiscal biennium. One hundred percent of requested funds will be used to fund new projects.

# FINAL

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BC	Small City Arterial Program
Budget Period: Budget Level:	2015- M2 -	-17 Inflation and Other Rate Changes

#### **Recommendation Summary Text:**

The re-establishment of the Small City Arterial Program.

The Small City Arterial Program (SCAP) provides funding to cities with a population of less than 5,000 to preserve and improve the arterial roadway system. Projects are selected through a competitive process. Project selection criteria include safety, physical condition, and sustainability.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
144-1 Transportation Improvement Account-State	12,250,000	12,500,000	24,750,000
Total Cost	12,250,000	12,500,000	24,750,000

#### **Package Description:**

This package supports the Small City Arterial Program (SCAP). The SCAP is funded by the Transportation Account-144. This program provides grants to cities with a population of less than 5,000 with arterial street projects that improve safety and physical condition, and support economic development and sustainability.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the Small City Arterial Program will be used for projects that meet program criteria in order to establish and maintain the integrity of small city arterials. Project selection criteria include safety, physical condition, and sustainability. Projects are selected through a competitive process.

#### **Performance Measure Detail**

#### Activity:

No measures submitted for package

#### **Incremental Changes**

#### Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. TIB's strategic plan goals and corresponding strategies include:

• Enhance Arterial Safety - Fund projects that have a high potential for collision reduction based on safety criteria.

- Support Economic Development Use growth and development criteria to coordinate timely investments with reliable development opportunities; Focus investments on downtown and activity centers.
- Maintain, Extend, and Preserve the Life of Streets Fund arterial preservation projects.
- Encourage Environmental Responsibility Develop curriculum and provide training to customers on environmentally sustainable design; Fund projects that support sustainable design and construction, driven by up-to-date sustainability criteria.

Additionally, this program directly supports the following Washington State transportation policy goals: Preservation; Safety; Environment; and Economic Vitality.

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priority for 1) Prosperous economy, 2) Sustainable energy and a clean environment, and 3) Healthy and safe communities. Specifically, TIB grants are a critical funding source for local governments in building and sustaining infrastructure systems, and preserving existing infrastructure.

The Small City Arterial Program also supports the Governor's Executive Order 14-04/Washington Carbon Pollution Reduction and Clean Energy Action. Specifically, the Governor highlights clean transportation and identifying opportunities to increase statewide investments in multimodal transportation. Through this program, TIB helps agencies build multimodal facilities.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for on-going projects as well as new ones. Maintaining a consistent grant program is important to continually meet ongoing local government preservation needs.

#### What alternatives were explored by the agency, and why was this alternative chosen?

No other alternatives were explored. Current law revenue is dedicated for this purpose. In order to be fiscally responsible and allocate funds to the best local projects, TIB budgets according to current revenue forecasts for future biennia.

#### What are the consequences of adopting or not adopting this package?

If this decision package is not funded, the Small City Arterial Program will not be offered and projects in both design and construction phases, awarded in previous years, will be impacted. This means TIB would not be able to reimburse local agencies for projects already under construction. Projects in design phase would be canceled. Additionally, most transportation projects in small cities would not be possible without TIB support. Deferring these projects would lead to higher long-term costs and potential economic disadvantage.

Continued program funding is crucial to meet current financial commitments for projects still under development as well as future reconstruction, rehabilitation, and preservation needs. Not funding this program would also negatively impact progress towards the following Washington State transportation policy goals: Preservation; Safety; Environment; and Economic Vitality.

#### What is the relationship, if any, to the state's capital budget?

Some projects may also receive funds from the State's capital budget as a separate funding source to pay for utility upgrades or repairs. The combination of funding sources is often critical in order to fully fund a single project.

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data, commitments for projects currently under construction, and future projects needed by eligible cities. Revenue is calculated using the gas tax revenue forecast provided by the Forecast Council plus carry-forward balances.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

About 30% of the requested funds will be used to fund new projects. The remainder will be used for existing grants and projects. Continued funding is necessary to pay for multi-biennial projects.

# FINAL

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BD	Small City Preservation Program
Budget Period: Budget Level:	2015- M2 -	-17 Inflation and Other Rate Changes

#### **Recommendation Summary Text:**

The re-establishment of the Small City Preservation Program.

The Small City Preservation Program provides funding to cities with populations of less than 5,000 for chip seal, overlay of existing pavement, and sidewalk maintenance of existing sidewalks. Project selection criteria includes: pavement condition, economy of scale, roadway width, loading, and sidewalk maintenance. The projects are selected through a competitive process.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
<ul><li>08M-1 Small City Pavement &amp; Sidewalk Acct-State</li><li>106-1 Highway Safety Account-State</li></ul>	3,109,000 500,000	2,825,600 500,000	5,934,600 1,000,000
Total Cost	3,609,000	3,325,600	6,934,600

#### **Package Description:**

The Small City Preservation Program is funded by the 08M-1 Small City Pavement & Sidewalk Account and 106 Highway Safety Account. This program provides funding to improve poor pavement conditions in cities with a population of less than 5,000. The program funds chip seal, overlay of existing pavement, and sidewalk maintenance of existing sidewalks. Project selection criteria includes: pavement condition, economy of scale, roadway width, loading, and sidewalk maintenance. The projects are selected through a competitive process.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the Small City Preservation Program will be used for projects that meet program criteria in order to increase the average pavement condition rating in small cities in the state of Washington. This will enable TIB to achieve or exceed performance targets.

#### **Performance Measure Detail**

#### Activity:

No measures submitted for package

#### **Incremental Changes**

Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. One of TIB's strategic plan goals is to maintain, extend, and preserve the life of streets. This program specifically supports the

strategy to continue to improve efficient delivery of small city preservation projects. Performance measures show that pavement conditions in small cities is improving specifically due to this investment.

Additionally, this program supports the Washington State transportation policy goal: Preservation (to maintain, preserve, and extend the life and utility of prior investments in transportation systems and services).

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priority for 1) Prosperous economy, 2) Sustainable energy and a clean environment, and 3) Healthy and safe communities. Specifically, TIB grants are a critical funding source for local governments in building and sustaining infrastructure systems, and preserving existing infrastructure.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for on-going projects as well as new ones. Maintaining a consistent grant program is important in order to continually invest the State's resources, which are dedicated to these purposes.

#### What alternatives were explored by the agency, and why was this alternative chosen?

No other alternatives were explored. Current law revenue is dedicated for this purpose. In order to be fiscally responsible and allocate funds to the best local projects, TIB budgets according to current revenue forecasts for future biennia.

#### What are the consequences of adopting or not adopting this package?

If this decision package is not funded, the Small City Preservation Program will not be offered and projects in both design and construction phases will be impacted. This means TIB would not be able to reimburse local agencies for projects already under construction. Projects in design phase would be canceled. Additionally, most transportation projects in small cities would not be possible without TIB support. Deferring these projects will lead to higher long-term costs and potential economic disadvantage.

Continued funding is crucial to meet current financial commitments for projects still under development as well as future preservation needs. Not funding this program would also negatively impact progress towards the Washington State transportation policy goal of preservation.

#### What is the relationship, if any, to the state's capital budget?

None

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data, commitments for projects currently under construction, and future projects needed by eligible cities. Revenue is calculated using the gas tax revenue forecast provided by the Forecast Council plus carry-forward balances.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

About 75% of the requested funds will be used to fund new projects. The remainder will be used for existing grants and projects. Continued funding is necessary to pay for multi-biennial projects.

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BE	Sidewalk Program
Budget Period:	2015-	17
Budget Level:	M2 - Inflation and Other Rate Changes	

#### **Recommendation Summary Text:**

The re-establishment of the Sidewalk Program.

The Sidewalk Program provides funding for pedestrian projects in small cities and urban agencies. This program is funded by the Transportation Improvement Account-144. Urban agencies and small cities compete separately for grants. Project criteria include safety, continuity and connectivity, pedestrian access, sustainability, and local support.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
144-1 Transportation Improvement Account-State	7,550,500	7,550,500	15,101,000
Total Cost	7,550,500	7,550,500	15,101,000

#### **Package Description:**

This package supports the Sidewalk Program, which provides funding for projects that improve pedestrian safety and access in urban and rural areas. TIB places a strong emphasis on projects that extend multimodal infrastructure rather than adding discontinuous segments. The Urban Sidewalk Program focuses on continuous pedestrian access in downtowns and activity centers designated in local comprehensive plans. In small cities, the Sidewalk Program places a development emphasis on connectivity between the central business district and specific pedestrian generators like schools and parks. Urban agencies and small cities compete for grants separately.

Questions: Contact Stevan Gorcester at 360.586.1139

#### Narrative Justification and Impact Statement

#### What specific performance outcomes does the agency expect?

Funding for the Sidewalk Program will be used to fund continuity of the sidewalk system, walkability of activity centers, and safety improvements.

#### **Performance Measure Detail**

#### Activity:

No measures submitted for package

#### **Incremental Changes**

#### Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. One of TIB's strategic plan goals is to improve mobility of people and goods. This program specifically supports the strategy to

#### **FINAL**

use criteria that identifies projects that improve access to non-motorized mobility options, transit, and freight.

Additionally, the program supports the following Washington State transportation policy goals: Preservation; Safety; Mobility; Environment; and Economic vitality.

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priorities for 1) Prosperous economy, 2) Sustainable energy and a clean environment by creating clean transportation options, and 3) Healthy and safe communities by decreasing the number of traffic-related fatalities.

This decision package also supports the Governor's Executive Order 14-04/Washington Carbon Pollution Reduction and Clean Energy Action. Specifically, the Governor highlights clean transportation and identifying opportunities to increase statewide investments in multimodal transportation.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for on-going projects as well as new ones. Maintaining a consistent grant program is important in order to continually invest the State's resources, which are dedicated to these purposes.

#### What alternatives were explored by the agency, and why was this alternative chosen?

No other alternatives were explored. Current law revenue is dedicated for this purpose. In order to be fiscally responsible and allocate funds to the best local projects, TIB budgets according to current revenue forecasts for future biennia.

#### What are the consequences of adopting or not adopting this package?

If this decision package is not funded, the Sidewalk Program will not be offered and projects in both design and construction phases, awarded in previous years, will be cancelled. This means TIB would not be able to reimburse local agencies for projects already under construction. Projects in design phase would be cancelled.

Continued funding is crucial to meet current financial commitments for projects currently under development as well as future sidewalk needs. Not funding this program would also negatively impact progress towards the following Washington State transportation policy goals: Preservation; Safety; Mobility; Environment; and Economic vitality.

#### What is the relationship, if any, to the state's capital budget?

Some projects may also receive funds from the State's capital budget as a separate funding source. The combination of funding sources can be critical in order to fully fund a single project.

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data, commitments for projects currently under construction, and future projects needed by eligible agencies. Revenue is calculated using the gas tax revenue forecast provided by the Forecast Council plus carry-forward balances

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

About 30% of the requested funds will be used to fund new projects. The remainder will be used for existing grants and projects. Continued funding is necessary to pay for multi-biennial projects.

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	A0	LED Street Light Program
Budget Period:	2015-	17
Budget Level:	<b>PL -</b> ]	Performance Level

#### **Recommendation Summary Text:**

The establishment of the LED Streetlight Program.

The LED Streetlight Program provides funding for streetlight replacement in low tax-base cities. Project selection criteria include leveraging other funds, potential savings, and owner/operating provider readiness (PUD, electric utility, city, etc.). The projects are selected through a competitive process with a focus on leveraging the state's buying power and efficient installation.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
106-1 Highway Safety Account-State	1,500,000	1,500,000	3,000,000
Total Cost	1,500,000	1,500,000	3,000,000

#### **Package Description:**

The LED Streetlight Program will be funded by the 106 Highway Safety Account. This program provides funding for streetlight replacement in cities with a low tax-base. Project selection criteria include leveraging other funds, potential savings, and owner/operating provider readiness (PUD, electric utility, city, etc.). The projects are selected through a competitive process with a focus on leveraging the state's buying power and efficient installation.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the LED Streetlight Program will be used for projects that meet program criteria in order to achieve electrical savings so funds can be redirected to street preservation. Project selection criteria include leveraging other funds, potential savings, and owner/operating provider readiness (PUD, electric utility, city, etc.).

#### **Performance Measure Detail**

#### Activity:

Incremental Changes

**FINAL** 

No measures submitted for package

#### Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. TIB's strategic plan contains two goals that this program directly supports: 1) Maintain, extend, and preserve the life of streets; and 2) Encourage environmental responsibility. The LED Streetlight Program helps cities with a low tax-base achieve electrical savings so funds can be redirected to street preservation. A TIB strategy to encourage environmental responsibility is to fund projects

that support sustainable design and construction.

Additionally, this program directly supports the following Washington State Transportation Policy Goals: 1) Preservation; and 2) Environment.

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the Governor's priority for: 1) Prosperous economy; 2) Sustainable energy and a clean environment; and 3) Healthy and safe communities.

This decision package also supports the Governor's Executive Order 14-04, which directs state agencies to develop a new statewide program to significantly improve the energy performance of street lighting within the state.

#### What are the other important connections or impacts related to this proposal?

This decision package will positively benefit the state in two ways: 1) Cities will experience greater energy savings and will be able to reinvest dollars saved on electricity bills in street preservation; and 2) Cities will reduce the state's carbon pollution emissions and improve energy independence.

#### What alternatives were explored by the agency, and why was this alternative chosen?

In 2012, the TIB initiated a solid state streetlight feasibility study to evaluate the costs, complications, and benefits of replacing outdated streetlights in small cities. The project's purpose was to create savings by reducing electrical usage in order for small cities to redirect funds to street preservation efforts. Six cities were selected for this pilot project based on geographic location and the various utility providers serving the community.

Preliminary results show the project pay-back period is five years, which includes total cost and all benefits (both financial and environmental). For every \$1 spent, the investment is expected to return \$2.34 over a 15-year analysis period.

#### What are the consequences of adopting or not adopting this package?

Cities are currently spending more resources than are necessary on large electricity bills associated with streetlights and ongoing streetlight maintenance. Because these funds are paid by a city's street fund, resources are wasted on high electricity bills and preservation of city streets is deferred. TIB provides funding to low tax-base cities for street preservation and rehabilitation. Deferral of preservation leads to higher long-term rehabilitation costs for TIB.

#### What is the relationship, if any, to the state's capital budget?

The TIB is working in partnership with the Department of Commerce to provide local governments multiple options in accessing state assistance to retrofit outdated streetlights. The TIB decision request has no impact on the state's capital budget. However, the other components of a streetlight program-including grants and loans to larger local agencies-may require capital budget support.

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

New WAC rule-making would be required.

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on pilot projects. Revenue is calculated based on the 2013-2015 biennium's Highway Safety Account appropriation to the TIB.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

One hundred percent of the requested funds will be used to fund new projects in the current biennium..

Agency:	407	<b>Transportation Improvement Board</b>
Decision Package Code/Title:	BG	Road Transfer/City Hardship Assist
Budget Period: Budget Level:	2015-17 M2 - Inflation and Other Rate Changes	

#### **Recommendation Summary Text:**

The re-establishment of the Road Transfer Program/City Hardship Assistance Program.

The Road Transfer Program/City Hardship Assistance Program funds rehabilitation and maintenance of eligible routes to cities with a population of 20,000 or less or with a net gain in cost responsibility due to a road jurisdictional transfer. The CHAP funds can be used for maintenance and rehabilitation of existing facilities and not for adding additional capacity.

#### **Fiscal Detail**

Operating Expenditures	<u>FY 2016</u>	<u>FY 2017</u>	<u>Total</u>
08M-1 Small City Pavement & Sidewalk Acct-State	900,000	900,000	1,800,000
Total Cost	900,000	900,000	1,800,000

#### **Package Description:**

The Road Transfer Program/City Hardship Assistance Program is funded solely by the 08M-1 Small City Pavement & Sidewalk Account. This program provides funding for rehabilitation and maintenance of eligible routes to cities with a population of 20,000 or less or with a net gain in cost responsibility due to a road jurisdictional transfer. The CHAP funds can be used for existing facilities and not for adding additional capacity.

Questions: Contact Stevan Gorcester at 360.586.1139

#### **Narrative Justification and Impact Statement**

#### What specific performance outcomes does the agency expect?

Funding for the Road Transfer Program/City Hardship Assistance Program will be used to fund projects that fall within program guidelines in order to defray the cost of maintenance of eligible former state highways.

#### **Performance Measure Detail**

#### Activity:

No measures submitted for package

#### Is this decision package essential to implement a strategy identified in the agency's strategic plan?

Yes. One of TIB's strategic plan goals and a Washington State transportation policy goal is to maintain, extend, and preserve the life of streets.

FINAL

#### **Incremental Changes**

#### Does this DP provide essential support to one or more of the Governor's Results Washington priorities?

Yes. This decision package directly supports the following priorities: 1) Prosperous economy; 2) Sustainable energy and a clean environment; and 3) Healthy and safe communities. Specifically, TIB grants are a critical funding source for local governments in building and sustaining infrastructure systems, and preserving existing infrastructure.

#### What are the other important connections or impacts related to this proposal?

This decision package provides funding for on-going projects as well as new projects. Maintaining a consistent grant program is important in order to continually invest the State's resources, which are dedicated to these purposes.

#### What alternatives were explored by the agency, and why was this alternative chosen?

No other alternatives were explored. Current law revenue is dedicated for this purpose. In order to be fiscally responsible and allocate funds to the best local projects, TIB budgets according to current revenue forecasts for future biennia.

#### What are the consequences of adopting or not adopting this package?

If this decision package is not funded, the Road Transfer Program/City Hardship Assistance Program will not be offered and projects in both design and construction phases, awarded in previous years, will be impacted. This means TIB would not be able to reimburse local agencies for projects already under construction. Projects in design phase would be canceled.

Continued funding is crucial to meet current financial commitments for projects still under development as well as future preservation needs. Not funding this program would also negatively impact progress towards the Washington State transportation policy goal of preservation.

#### What is the relationship, if any, to the state's capital budget?

None

#### What changes would be required to existing statutes, rules, or contracts, in order to implement the change?

None

#### Expenditure and revenue calculations and assumptions

Expenditure calculations are based on historical data, commitments for projects currently under construction, and future projects needed by eligible cities. Revenue is calculated using the gas tax revenue forecast provided by the Forecast Council, plus carry-forward balances.

#### Which costs and functions are one-time? Which are ongoing? What are the budget impacts in future biennia?

About 50% of the requested funds will be used to fund new projects. Any residual CHAP funds at the end of the biennium will be used for the Small City Preservation Program.

# Agency & Program Overview

The Transportation Improvement Board (TIB) was created to assure equitable and efficient investment in local transportation projects throughout Washington State. Cities and counties with urban unincorporated areas are eligible to apply for funding through grant programs that target street construction, resurfacing, and sidewalks.

TIB programs are driven by performance feedback and Lean process improvements. The TIB performance dashboard (right) is a tool used by staff to monitor financials and measure program effectiveness. The TIB's dashboard web address is www.tib.wa.gov/TIBDashboard/. The majority of data used in this report come from the TIB Dashboard.

# **TIB Strategic Plan**

At its March 2013 board meeting, the Transportation Improvement Board adopted a ten-year strategic plan. The plan aligns TIB program and administrative goals with the agency's charter (RCW 47.26.084). It also reflects TIB's mission, core values, and the state transportation policy goals (RCW 47.04.280).

# **TIB Programs**

Through administration of the following grant programs, the TIB strives to meet strategic plan goals:

- Urban Arterial Program—Fund projects that support safety, growth and development, physical condition and mobility;
- Arterial Preservation Program—Enable larger scale preservation projects at lower unit costs;
- Small City Arterial Program—Establish the integrity of small city street system while minimizing costs;
- Small City Preservation Program—Bring small city pavement rating average above 70 PCR;
- City Hardship Assistance Program—Maintain transferred state highways at 70 PCR;
- Sidewalk Program—Establish highly connected pedestrian networks in downtowns and activity centers; and
- LED Streetlight Program—Modernize streetlights to achieve lower operating costs and save energy.

# **Program Funding**

The majority of TIB funding comes from three cents of the state gas tax, totaling about \$100 million per year (Transportation Improvement Account). In 2005, the Legislature established the Small City Pavement and Sidewalk Account to address small city preservation needs. Recently, TIB also received funds from the Highway Safety Account for preservation in small and low tax-base cities, as well as the LED Streetlight Program.

# **Inside this Report**

# **Transportation Improvement Board Programs by Account**

# **TIB Program Goal: Enhance Arterial Safety**

TIB Strategy: Fund projects that have a high potential for crash reduction based on safety criteria.

Related TIB programs: Urban Arterial Program, Small City Arterial Program, Sidewalk Program

Related State Transportation System Policy Goal: Safety

*Supports the Governor's Priorities:* TIB strategic plan outcomes directly support *Results Washington* Goal 4/Healthy & safe communities

- Safe people/Traffic
  - o Decrease number of traffic related fatalities on all roads

#### Background

Although several TIB programs (noted in box above) enhance arterial safety, the Urban Arterial Program has the greatest impact because grants make improvements to the state's busiest urban arterials. For years, TIB has tracked improvement in crash data on funded projects.

Urban Arterial Program safety criteria were recently modernized to reflect new national standards. TIB uses AASHTO's 1<sup>st</sup> Edition, Volume 1, 2010 Highway Safety Manual to predict crash frequency with and without planned improvements.

#### Metrics

*Measure:* Percent reduced crashes on arterials (urban arterial programs only)

**Why do we measure this?** The TIB strives to fund projects that have a high potential for crash reduction. Crash data two years before construction and two years after project completion are compared to evaluate any reduction.

*Target level:* A reduction of at least 20% on arterials. *Current performance:* 16.84%

The spark line above shows the percent reduction in crashes on completed TIB-funded projects over five years. Variation in performance data is considered to be normal. The percent reduction in crashes is calculated annually.

# **TIB Program Goal: Support Economic Development**

TIB Strategies:

- Use growth & development criteria to coordinate timely infrastructure investments with reliable development opportunities
- Prioritize investments in downtown and activity centers

Related TIB programs: Urban Arterial Program, Small City Arterial Program

Related State Transportation System Policy Goal: Economic Vitality

*Supports the Governor's Priorities:* TIB strategic plan outcomes directly support *Results Washington* Goal 2/ Prosperous economy

- Business vitality/Competitive and diverse economy
  - Increase state real GDP
  - o Increase gross business income
  - Sustainable, efficient infrastructure/Sustainable transportation
    - Increase the percentage of Washingtonians using alternative transportation commute methods
    - o Improve travel and freight reliability on strategic corridors resulting from economic growth
    - o Maximize existing capacity of strategic corridors
    - o Reduce number of pedestrian and bicycle fatalities on public roadways

#### Background

The Urban Arterial Program and the Small City Arterial Program have criteria to evaluate the extent to which a street project is needed to support or retain local economic development. For the urban program, criteria are based on the scale of the development site (number of jobs anticipated, acreage developed, etc.), developer support, necessity, and location. Criteria also evaluate the likelihood development will occur based on permits issued and private investment leveraged. The small city program focuses on business district revitalization.

#### Metrics

*Measure:* Expected development that occurs on or near a TIB project

*Why do we measure this?* TIB strives to support timely investments in transportation projects that are necessary to support economic development. *Target level:* More than 70% of economic development projects have associated activity within five years.

*Current performance:* Major growth and development is observed at 65% of projects; Minor is observed at 6% of projects; Total=71% *Future performance:* With newly adopted criteria in the Urban Arterial Program, the percent of projects with growth and development activity five years after project completion is expected to increase.

# **TIB Program Goal: Improve Mobility of People and Goods**

#### TIB Strategies:

- Fund projects that strategically improve traffic flow and enhance mobility options
- Encourage projects that fill gaps and complete corridors
- Use criteria to identify projects that improve access to non-motorized mobility options, transit and freight

**Related TIB programs:** Urban Arterial Program, Arterial Preservation Program, Small City Arterial Program, Small City Preservation Program, Sidewalk Program

Related State Transportation System Policy Goal: Mobility

Supports the Governor's Priorities: TIB strategic plan outcomes directly support Results Washington Goal 2/ Prosperous economy

- Sustainable, efficient infrastructure/Sustainable transportation
  - Increase the percentage of Washingtonians using alternative transportation commute methods
  - o Improve travel and freight reliability on strategic corridors resulting from economic growth
  - o Maximize existing capacity of strategic corridors
  - o Reduce number of pedestrian and bicycle fatalities on public roadways

# Background

TIB's construction, resurfacing and sidewalk programs support the goal of improving mobility of people and goods. The small city arterial program, urban arterial program, and the sidewalk programs fund projects that extend previously improved corridors or fill gaps allowing people to realize the full benefit of prior investments.

The Urban Arterial Program criteria evaluate the extent to which a project reduces localized congestion. Criteria are based on the principles of the Transportation Research Board's Highway Capacity Manual 2010, Vols. 1-3. A project's current level of service is compared to anticipated level of service post-project.

TIB requires sidewalks on both sides of a street in urban arterial projects and at least one side in small city projects. TIB places strong emphasis on projects that extend multimodal infrastructure rather than adding discontinuous segments. Sidewalk programs in urban areas focus on continuous pedestrian access in downtowns and activity centers designated in local Comprehensive Plans. In small cities, sidewalk development emphasizes connectivity between the central business district and specific pedestrian generators like schools and parks.

TIB helps agencies develop bicycle infrastructure by providing funding for lanes or paths along arterials when consistent with a non-motorized master plan. Again, emphasis is placed on continuity and extension of existing infrastructure.

## **Metrics**

Measure: Miles of street extension or improvement awarded

*Why do we measure this?* TIB strives to make system-wide improvements by funding projects that fill gaps and complete corridors. This measure tracks the number of miles of new projects that extend improvements or complete gaps in improvements.

*Target level:* At least 15 miles of projects extending, improving or completing gaps awarded each calendar year. *Current performance:* 18.04 miles (2013); 10.08 (2012)

Measure: Miles of bike lanes awarded

*Why do we measure this?* TIB strives to build a continuous network of mobility options. This measure tracks the number of miles of bike lanes selected in the past year.

Target level: At least 10 miles of bike lanes awarded each calendar year.

Current performance: 12.65 miles (2013); 8.09 (2012)

Measure: Miles of sidewalk awarded

*Why do we measure this?* TIB strives to encourage multimodal access by funding projects that extend multimodal infrastructure rather than adding discontinuous segments.

Target level: At least 10 miles of sidewalks awarded each calendar year.

*Current performance:* 23.59 miles (2013); 21.11 (2012)

*Measure:* Percent of projects predicted to provide a Level of Service (LOS) increase

Why do we measure this? Prior to selection, a project's current level of service is compared to anticipated level of service post-project. This helps ensure that selected projects will remove bottlenecks and improve traffic flow.

**Target level:** 25% of projects increase to an A-C level **Current performance:** 18% of projects propose improvement to increase from D-F Level of Service to A-C Level of Service

**Future performance:** With newly adopted criteria in the Urban Arterial Program, the percent of projects with enhanced Level of Service is expected to increase.

# TIB Program Goal: Maintain, Extend, and Preserve the Life of Streets

#### TIB Strategies:

- Continue to improve efficient delivery of small city preservation projects
- Stabilize funding for arterial preservation projects in low tax base cities

**Related TIB programs:** Arterial Preservation Program, Small City Preservation Program, City Hardship Assistance Program, LED Streetlight Program

#### Related State Transportation System Policy Goal: Preservation

Supports the Governor's Priorities: TIB strategic plan outcomes directly support Results Washington Goal 2/ Prosperous economy

- Sustainable, efficient infrastructure/Reliable infrastructure
  - o Maintain infrastructure assets
  - o Improve percentage of state and local bridges in fair or better condition
  - o Improve percentage of state and local pavement in fair or better condition

# Background

TIB offers several grant programs that assist cities in maintaining, extending, and preserving the life of streets: 1) Small City Arterial Program; 2) Arterial Preservation Program; and 3) City Hardship Assistance Program. Once established, TIB's LED Streetlight Program will help cities reduce streetlight electricity and maintenance costs so funds can be reinvested in street maintenance and preservation.

## **Metrics**

Measure: Miles of resurfacing awarded

*Why do we measure this?* An emphasis on infrastructure preservation has led TIB to monitor how many miles of damaged pavement are selected for resurfacing each year.

Target level: At least 20 miles of resurfacing awarded each calendar year.

Current performance: 24.88 miles (2013); 35.8 (2012)

*Future performance:* The number of miles of resurfacing awarded in the future is directly related to funding of the Arterial Preservation Program and the Small City Preservation Program. Both these programs have received an appropriation from the Highway Safety Account.

**Measure:** Percent of miles in small cities needing preservation treatment; Pavement Condition Rating (PCR) between 30 and 70 **Why do we measure this?** Street preservation at the right time is critical to extend and preserve the life of current assets. TIB is a key funder of small city street preservation.

*Target level:* Less than 30% of the small city street system with a PCR between 30 and 70.

*Current performance:* 32.67% of miles in small cities have a PCR score between 30 and 70.

The spark line above shows the percent of miles in small cities over the past five years with a PCR between 30 and 70. The trend is that over time, there are fewer miles of street needing preservation treatment. *Measure:* Percent of small cities with an average Pavement Condition Rating (PCR) score above 70 *Why do we measure this?* TIB manages its Small City Preservation Program with the goal of bringing the average PCR in all small cities to at least 70, this is because pavement ratings below 70 are more costly to repair. *Target level:* 100% of cities with an average PCR score above 70.

*Current performance:* 74.5% (2013); 72% (2012)

*Future performance:* The percent of cities with a PCR score above 70 is expected to increase. The TIB is expected to reach performance target levels more quickly with continued appropriations of funds from the Highway Safety Account.

# **TIB Program Goal: Encourage Environmental Responsibility**

### TIB Strategies:

- Develop curriculum and provide training to customers on environmentally sustainable design
- Fund projects that support sustainable design and construction, driven by up-to-date sustainably criteria

**Related TIB programs:** Urban Arterial Program, Arterial Preservation Program, Small City Arterial Program, Small City Preservation Program, Sidewalk Program, LED Streetlight Program

## Related State Transportation System Policy Goal: Environment

*Supports the Governor's Priorities:* TIB strategic plan outcomes directly support *Results Washington* Goal 3/ Sustainable energy & a clean environment

- Sustainable and clean energy/Clean transportation
  - o Reduce transportation related greenhouse gas emissions
  - o Reduce the average emissions of greenhouse gases for each vehicle mile traveled
- Sustainable and clean energy/Clean electricity
  - Reduce greenhouse gas emissions from electrical energy consumption
- Healthy fish and wildlife/Pacific salmon
  - Increase the percentage of ESA listed salmon and steel-head populations at healthy, sustainable levels
  - o Increase the number of fish passage barriers corrected

TIB strategic plan outcomes in this area also directly support the Governor's Executive Order 14-04: Washington carbon Pollution Reduction and Clean Energy Action.

- Energy efficiency: Upgrade the energy efficiency of all street lighting within the state.
- Clean transportation: Identify and implement opportunities to increase continuity of multimodal facilities.

## Background

In 2010, TIB created sustainability criteria for the arterial construction programs. Over time, the criteria have been update to keep current with sustainable design and construction standards. Criteria now include more up-to-date LID or enhanced treatment stormwater controls, correction of fish barrier, use of non-potable water for irrigation and reduction in pavement width.

TIB's LED streetlight feasibility study, conducted 2012-2014, evaluated the cost, challenges, and benefits of replacing outdated streetlights in small cities with low-energy lights. The project's purpose was to create savings by reducing electrical usage so those funds could be directed to street preservation. Six cities were selected for the pilot project based on geographic location and the various utility providers serving the community.

## Metrics

#### Measure: Average number of points achieved in sustainability

Why do we measure this? TIB sustainability criteria evaluate if agencies are using sustainable design and best practices. Because sustainable construction methods are constantly evolving, this category requires continual

evaluation. As new practices become standard, it's expected that the average number of points achieved in this category will increase. Once criteria are updated, it's expected that the average number of points will fall. *Target level:* An average between 11 and 13 sustainability points achieved during each call for projects. *Current performance:* 10.5 points (2013); 11.12 points (2012)

Measure: LED streetlight demonstration project estimated return on investment

*Why do we measure this?* Small cities lack the capital budget to replace older, less efficient infrastructure and therefore are not able to take advantage of the savings associated with LED lights. Investing funds saved from lower electrical bills into street preservation could slow the deterioration of city street condition over time. *Target level:* Seven years.

*Current performance:* Preliminary results show the project pay-back period is five years, which includes total cost and all benefits (both financial and environmental). For every \$1 spent, the investment is expected to return \$2.34 over a 15-year analysis period.

*Future performance:* With funding for the LED Streetlight Program, it is anticipated 4,800 streetlights would be replaced over the 2015-17 biennium.

	,		
	Lights	Project	
City	Replaced	Cost	Utility Provider
Benton City	203	\$61,000	Benton PUD
Blaine	632	\$263,000	City
Buckley	289	\$342,000	Puget Sound
			Energy
Coulee Dam	291	\$138,000	City
Palouse	156	\$174,000	Avista
Ridgefield	351	\$140,000	Clark Public
			Utilities
Total	1,922	\$1,118,000	

#### **LED Streetlight Pilot Project Statistics**

# **TIB Administrative Goal: Communicate Effectively**

#### **TIB Strategies:**

- Broadly communicate TIB funding opportunities to external audiences
- Clearly communicate agency responsibilities for managing the TIB project in order to access TIB grants

Related TIB programs: All

Related State Transportation System Policy Goal: Stewardship

*Supports the Governor's Priorities:* TIB strategic plan outcomes directly support *Results Washington* Goal 5/ Efficient, effective & accountable government

- Customer satisfaction and confidence/Customer satisfaction
  - o Increase/maintain customer service satisfaction with accuracy, timeliness, respectfulness
- Customer satisfaction and confidence/Customer confidence
  - Increase/maintain timely delivery for state services

# Background

TIB's success in meeting strategic plan goals and performance outcomes is in part due to the strength of our partnership with local governments, who are the owners and operators of TIB-funded projects. In order for TIB to be successful, TIB must broadly communicate the annual call for projects in order to select strong projects, and local agencies must understand and manage TIB-funded projects according to specific rules and timelines.

## **Metrics**

*Measure:* Number of attendees at TIB funding workshops *Why do we measure this?* The strength of a local agency's application is what helps TIB meet strategic plan goals and performance outcomes. Therefore, it is important that local agency representatives are trained on the project components that will help them score well when it's time for project selection. TIB does this by encouraging any local agency personnel who are involved in the application process to attend a TIB funding workshop.

*Target level:* More than 225 local government representatives trained.

*Current performance:* 258 people attended funding workshops in 2014; an increase of 24 over the previous year.

# **TIB Administrative Goal: Maintain Stable Operations**

#### **TIB Strategies:**

- Position agency for new revenue
- Utilize demand model to anticipate future expenditures
- Report progress on measures to board annually

Related TIB programs: All

Related State Transportation System Policy Goal: Stewardship

*Supports the Governor's Priorities:* TIB strategic plan outcomes directly support *Results Washington* Goal 5/ Efficient, effective & accountable government

- Resource stewardship/Cost-effective government
  - o Increase the number of value added improvement ideas implemented
- Resource stewardship /Transparency and accountability
  - Increase amount of data available in downloadable and searchable format
- Resource stewardship /Accountability
  - Increase the number of Results Washington outcome measures and improve leading indicators

# Background

The TIB's financial plan is based on the following major components: 1) outstanding obligations; 2) current fund balance; 3) average project time to completion; and 4) future revenue forecasts. With this information, TIB is better able to anticipate future expenditures and determine an appropriate program size for the annual Call for Projects.

# Metrics

Measure: Accurate demand model to anticipate future expenditures

*Why do we measure this?* TIB reimburses local agencies for project costs as they are incurred; therefore, it is important to accurately anticipate when a local agency will likely request reimbursement and when a project will be completed. Depending on the type of work, the average project can take anywhere from two to six years to be completed.

\* Year 1 represents the portion of the year between the grant given and the end of the fiscal year (typically November through June)

#### *Measure:* Net revenue—total revenue minus expenses for previous three months

Why do we measure this? In order to meet current and future commitments, TIB needs to have a sufficient account balance. Recognizing that there are cyclical demands for TIB funds (based on the construction season) and that local agencies request reimbursement for selected projects over time, TIB must anticipate short-term and long-term demand on funds; net increases cover net decreases during construction months.

Target level: Negative \$2 million to positive \$2 million.

Current performance: \$3,670,000

#### Measure: Percent of dollars spent on construction

*Why do we measure this?* Projects at different stages draw on TIB resources at different rates. For example, a project under construction draws on cash more quickly than a project in design. In order to maintain stable operations, TIB must fund a balance of projects in design phase and construction phase. Further, TIB must sufficiently monitor projects that move towards completion in a predictable manner.

*Target level:* Total funds spent on construction should be between 85% and 90% of the total TIB funds spent in the calendar year.

Current performance: 94.38 (2013); 86.25 (2012)

#### Measure: Percent of current commitment that is in delayed status

**Why do we measure this?** All TIB projects have a time based fund demand projection. These projections are used to determine the size of future funding programs as well as payment ability. If too many projects become delayed it becomes difficult to determine future fund demand and can result in TIB over-programming or under-programming project call sizes. This can also lead to grant payments not being made in a timely manner due to the lack of cash balances.

*Target level:* Less than 10% of projects in delayed status. *Current performance:* 3.3% of projects in delayed status

TIB 2015-2017 Budget Submittal

# **TIB Administrative Goal: Effective Project Management**

#### TIB Strategies:

- Apply constructability criteria
- Active project management
- Develop major project grants program
- Collaborate to establish design-only and hybrid loan programs

### Related TIB programs: All

## Related State Transportation System Policy Goal: Stewardship

Supports the Governor's Priorities: TIB strategic plan outcomes directly support Results Washington Goal 5/ Efficient, effective & accountable government

- Resource stewardship/Cost-effective government
  - o Increase the number of value added improvement ideas implemented
- Resource stewardship/Transparency and accountability
  - o Increase amount of data available in downloadable and searchable format
- Resource stewardship/Accountability
  - Increase the number of Results Washington outcome measures and improving leading indicators

# Background

The TIB must effectively manage more than \$100 million in annual revenue, between 300 to 400 active projects, and process customer payments promptly so local agencies do not experience unnecessary construction delays. To do this, TIB holds regular inventory control meetings to review the status of each project as well as regular financial control meetings to review the status of finances and performance metrics.

# Metrics

Measure: Percent of remaining dollars committed to a delinquent project (outstanding grant amount on any project older than the expected program lifecycle)
Why do we measure this? TIB has constructability criteria to identify and fund projects that have a high potential for

completion. Through monthly inventory control meetings, TIB staff monitors projects from the time they are selected to completion, with the goal of 100% of projects achieving completion. *Target level:* Less than 5% of dollars committed to delinquent projects.

Current performance: 3.47%

The spark line above shows the outstanding grant amount on any project older than the expected program life cycle over the past five years.

*Measure:* Percentage of correspondence processed on time over the last three months *Why do we measure this?* TIB has a commitment to providing excellent service to our customers and one way this is accomplished is by processing any project correspondence in a timely manner. Customers have project deadlines that must be met and they depend on TIB to act quickly on project actions, such as approval to award, so they can meet their own schedule. *Target level:* Funding status—30 days; Construction approval—10 days; Bid award—7 days; Contract completion—30 days.

*Current performance:* 89.8% of project-related correspondence was process on time during the three previous calendar months.

# Transportation Improvement Board Strategic Plan 2013-2023

# Annual Assessment January 30, 2014

When TIB's strategic plan was adopted, it was determined that the agency would conduct a self-assessment charting ongoing progress, targets, and measures. The Annual Assessment is a scorecard completed every January. It is displayed on the TIB Dashboard and charts ongoing progress and performance metrics.

## FINANCIAL HEALTH

TIB's financial health is stable. In November 2013, TIB granted \$111.4 million to local agencies.

Program size has been larger in recent years for several reasons:

- The Legislature appropriated \$10 million in funds from the Highway Safety Account for agency programs;
- Lower construction costs allowed surplused funds to be reallocated for grants;
- Lower debt service puts more funds towards grant programs;
- Average project lifespan is shorter leading to quicker turn-around; and
- More funds were allocated to grant programs to counteract a rising fund balance for the Transportation Improvement Account (TIA).

Additionally, a rapid action initiative to stabilize the TIA fund balance was launched in 2011. This initiative included grants for preservation projects, investment in TIB's Red Town Initiative. construction-ready grants, and project increases. Reaching a high of more than \$53 million in July 2012, the TIA is now at target level, between \$20 and \$40 million. Rapid action projects are now complete or ready for closeout.

#### **KEY PROCESS INDICATORS**

The TIB Dashboard was augmented with an annual assessment scorecard to help evaluate TIB's annual performance. This page inventories approximately 20 metrics that derive from strategic plan goals and objectives. As more annual data are collected, the scorecard will be updated.

Measure	2012	2013	Historic Data	Trend
Percent Reduced Collisions on Arterials	22.05%	16.84%		_
Percent of Cities with an Average PCR Score above 70	72%	74.5%	/	-
Projects Completed	110	147	/	~
Projects Awarded	167	123		
Miles of Sidewalk Awarded	21.11	23.59	/	-
Miles of Resurfacing Awarded	35.8	24.88		<u> </u>
Miles of Street Extension or Improvement Awarded	10.08	18.04	1	~
Miles of Bike Lanes Awarded	8.09	12.65	1	~
Average Number of Points Achieved in Sustainability	11.12	10.5	$\backslash$	-
Agencies Without Awards in the Past 7 Years	44	45	/	-
Number of Projects not Billing in Last Calendar Year	78	101	/	~
Percent of Dollars Spent on Design	13.75%	5.62%		- 2
Percent of Dollars Spent on Construction	86.25%	94.38%	1	_ 2
Percent of Transactions Processed Within Target	97.8%	99.24%	1	-
Number of Active Projects	435	422	$\backslash$	-
Total Outstanding Obligation	\$293M	\$300M	/	-
Fund Balances - TIA	\$35.7M	\$33.6M	$\backslash$	-
Fund Balances - SCPP	\$2.15M	\$1.20M		-
Average Age of Active Projects - Urban	2.45	2.33		-
Average Age of Active Projects - Small City	0.70	1.03	/	-
Number of Delayed Projects	7	10	/	-

Green indicators: The majority of scorecard measures are within target.

Yellow indicators: Five of the 21 targets call for close monitoring. They are:

- Average number of points achieved in sustainability As new sustainable practices become standard, it's expected the average number of points achieved in this category will increase. There was a slight decrease in sustainability points achieved between 2012 (average 11.12) and 2013 (average 10.50).
- Number of projects not billing in last calendar year Projects not billing can be an indication of a hidden project problem. This metric is tracked in the monthly inventory control meetings.
- Percent of dollars spent on design Projects at different stages (design/construction) draw on TIB resources at different rates. This metric is tracked at quarterly financial control meetings.
- Percent of dollars spent on construction Projects at different stages (design/construction) draw on TIB resources at different rates. This metric is tracked at quarterly financial control meetings.
- Number of delayed projects Project delays can have a negative impact on TIB finances. This metric is tracked in the monthly inventory control meetings.

#### **KEY ACCOMPLISHMENTS**

TIB recent achievements include:

- Adoption of the TIB Strategic Plan. In March 2013, the board adopted a ten-year strategic plan, aligning program and administrative goals with the agency's charter, mission, core values and state transportation policy goals.
- Updated criteria implemented for the Urban Arterial Program. Program criteria were updated to identify the strongest projects in safety, growth and development, mobility, and physical condition. Additionally, all projects are rated in sustainability and constructability.

- Six small cities receive new low-energy streetlights. A pilot program to demonstrate savings from new low-energy streetlight technology benefited six small cities throughout the state.
- Arterial Preservation Program implemented. With funds from the Highway Safety Account, TIB created the Arterial Preservation Program, making grants for overlay available to 68 urban cities with low property value.
- **Continued improvement in small city pavement condition.** Through strategically investing grant funds in 165 small cities throughout the state, the pavement condition in small cities is improving. The 2012 OFM attainment report noted that this is the only category of agencies in the state where this is happening.
- Small city program re-engineering project launched. In September 2013 the board endorsed the goal of establishing and maintaining the integrity of small city street infrastructure in a cost-effective manner by evaluating the funding and selection methodology used for small city programs.

## **FUTURE ISSUES**

In order to secure TIB's financial and programmatic strength in the future, long-term financial stability needs to be maintained. The majority of TIB funding comes from three cents of the state fuel tax, totaling about \$100 million per year. Fuel tax revenues are expected to remain flat. Meanwhile, city and county transportation needs continue to grow, as do project costs. New revenue is ideal, but TIB needs to operate within resources.

In addition to fuel tax revenues, the Legislature has appropriated \$10 million from the Highway Safety Account to TIB primarily for urgent preservation needs and the streetlight pilot program. Continuation of this funding is critical in order to continue funding the Arterial Preservation Program and formalizing a low energy streetlight program. These funds also augment the Small City Preservation Program.

# **TIB Future Calls\***

Fiscal Year	Call Size	Programs
2015	\$105 Million	SCAP, SCPP, SP, UAP, LED, APP, RTP
2016	\$95 Million	SCAP, SCPP, SP, UAP, RTP

\*Figures are estimates. Future calls are set anually by the board and are based on available revenue, current grant obligations, and program stategies.

# **TIB Lifecycle Financial Models**

Each chart represents the percentage of grants spent by year. Year one represents the portion of the year between the grant given and the end of the fiscal year, typically November through June.

The sample size for APP is small as the program has not been around a long time. The financial model in the future should take into account any policy decisions on how long grants will be available.

## Enterprise Risk Management Update

TIB is a state agency that grants funds to local governments for street preservation and construction projects. Therefore, TIB is not normally exposed to traditional public sector tort risk, which is more common for the owner/operator of a capital system. TIB's greatest risks fall into three general categories: 1) Revenue, 2) Expenditure and 3) Project.

Description	Assessment	Action Plan
<b>Revenue downturn</b> —TIB is almost entirely dependent upon revenue from the state's fuel tax. Any downturn that is not anticipated by the Forecast Council could mean TIB's total project financial commitments surpass actual revenues.	Risk Classification Level— <b>Medium</b> Fuel tax revenues could fall due to an emergency, significant weather event, economic downturn, or large shift in transportation patterns.	<b>Forecast monitored</b> —Staff monitors the fuel tax forecast at quarterly Financial Control Meetings, and updates the financial plan accordingly.
<b>Appropriation risk</b> —The majority of TIB revenues are dedicated under current law. Because capital projects are constructed over several years, any decrease in appropriation would impact previously-awarded projects in both design and construction phases.	Risk Classification Level— <b>High</b> Due to significant transportation budget pressures, risk associated with appropriation level is elevated.	Maintain executive branch/legislative relations—Staff has engaged in business planning for lower appropriation levels.
<b>Predictive failure</b> —TIB uses a demand model to anticipate when agencies will expect reimbursement for TIB funds. Any flaw in the demand model could impact cash flow.	Risk Classification Level— <b>Low</b> Demand is calculated based on historical data, which is updated annually.	<b>Continual financial monitoring</b> —TIB staff quarterly Financial Control Meetings to monitor financials. Additionally, TIB's performance dashboard is a tool that displays fund balance trends, remaining commitment, and account payables.
<b>Debt overrun</b> —High debt payments mean fewer funds are available for new capital projects.	Risk Classification Level— <b>Low</b>	<b>Paying down debt</b> —Over the past decade, TIB has strategically paid down debt. Lower debt service payments allow greater resource availability for capital projects.
<b>Project failure</b> —Project failure occurs when a project does not reach construction after TIB funds have been expended.	Risk Classification Level— <b>Medium</b> TIB experiences consistent exposure to project failure risk, although business processes are designed to prevent adverse impacts.	<b>At-Risk project monitoring</b> —Various levels of loss prevention are implemented depending upon the project's risk level. Moderate risk projects are monitored at monthly meetings; high risk projects may be issued a Stop Work Order and the executive director regularly meets with the project team.
<b>Project cost exposure</b> —TIB is a critical funding partner in local government capital projects and works as a catalyst to help agencies complete projects.	Risk Classification Level— <b>Medium</b> TIB has consistent exposure to higher project costs, but processes are designed to prevent adverse impacts.	<b>Continual project monitoring</b> —TIB authorizes when a project transitions to a new phase, and cost information is reviewed. According to WAC, the executive director has authority to grant increases up to specified amounts. Other increases are Board approved.
Wrong project/scope—Some selected projects may not produce expected benefits or correct the intended problem.	Risk Classification Level—Low	<b>Project selection</b> —Continually updated criteria evaluate project readiness and assist staff in determining whether or not a project is likely to reach completion.
